

APOLOGETICS

Reasons for Belief

Lesson 4: Did humans really walk with dinosaurs?

Then God said, "Let us make mankind in our image, in our likeness, so that they may rule over the fish in the sea and the birds in the sky, over the livestock and all the wild animals, and over all the creatures that move along the ground." (Genesis 1:26)

Introduction

Our Bible verse above says that God created the livestock and all the wild animals. This would have included dinosaurs, and this was on day six of the creation week, about 6,000 years ago. But paleontologists say that the dinosaurs lived many millions of years ago and they became extinct 65 million years ago. So, both statements cannot be true. We need to investigate to find the truth.

When was the name dinosaurs first introduced?

Can we scientifically determine the date of anything in the past?

What two examples show that millions of years are wrong?

When did mankind understand what dinosaurs looked like?

What is soft tissue?

What does the presence of soft tissue tell about when dinosaurs lived?

What are your favorite Drawings, Paintings, moldings, or carvings of dinosaurs?

What did Carl Werner discover about the creatures that lived with dinosaurs?

Why should there not be any carbon 14 in dinosaur bones?

How is its presence being covered up?

If dinosaurs lived with birds, what problem does this give evolutionists?
